DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Or

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 2. Claims 35, 36, 42, 43 & 44 are rejected under 35 U.S.C. 102(e) as being anticipated by USP 6,647,649 to Hunt et al. (herein referred to as "Hunt").

Hunt teaches a microparticle taggant having two or more distinguishable marker layers corresponding to a predetermined numeric code, namely a binary code (see abstract & col. 3, lines 14-20). The binary system comprises two bits, 0 and 1 (col. 4, lines 60-67).

3. Claims 50, 51, 54 & 55 are rejected under 35 U.S.C. 102(b) as being anticipated by USP 5,760,394 to Welle (herein referred to as "Welle").

Welle teaches a method of identifying and authenticating products wherein a first taggant and a second isotopic taggant are used in combination. See col. 2, lines 31-67. By this method a batch of products can be distinguished and identified.

Allowable Subject Matter

4. Claims 37, 48 & 49 are allowed.

5. The following is a statement of reasons for the indication of allowable subject matter: the prior art does not teach or suggest the method of encoding a taggant system or chemical taggant such as that instantly claimed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Monique T. Cole whose telephone number is 571-272-1255. The examiner can normally be reached on Monday-Thursday from 6:30 A.M. to 4:00 P.M.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jill Warden can be reached on 571-272-1267. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
